

# WALK-INS

Walk-in coolers and freezers can be designed for any application and configuration and are located indoors, outdoors, or in basements. Walk-in coolers can be used for food or beverage storage with glass doors for beer and keg storage for restaurants and convenient stores. Dine Company supplies and installs walk-ins from six foot by six foot to warehouse capacity storage with drive-in bay doors.

Dine Company recently completed a 20 foot by 30 foot walk-in freezer (-40 degree) at a blood bank and 20 foot by 80 foot walk-in cooler to meet medical code requirements.

***There are many factors to consider when purchasing a walk-in cooler or freezer. Let the professionals at Dine Company guide you to the best options available for your space and budget.***
